

A man is lying in a white hammock on a stone patio, looking at a tablet. He is wearing a blue t-shirt, grey pants, and a watch. A black awning is positioned over him, and a lush garden with a hedge and trees is in the background.

## RESEARCH AND DEVELOPMENT

Your sun awning profiles have been made from top quality aluminium. One of the main advantages of aluminium is that it's strong and solid, but also very light-weight. Aluminium boasts characteristics which make it almost maintenance-free and warranty a long life. All these elements combined have made aluminium the perfect material to use as a basis for your sun awning.

We are proud owners of the AluEco certificate. The AluEco foundation promotes sustainability and ensures aluminium is recycled into top quality products, with a minimal environmental impact.

# SHARE YOUR MOMENTS!

# SPRING CLEAN!

It goes without saying you are going to want to enjoy your Verano® product(s) for as long as possible. Cleaning the product will certainly contribute to a long life. That's why we will provide you with a step-by-step plan to help you with the cleaning.

## WHAT WILL YOU NEED?

DRY LUBRICANT

CLEANING PRODUCTS  
WITH A LOW PH VALUE  
(<7.5)

CHAMOIS

BRUSH

LUKEWARM WATER  
(MAX 35°C)

## ALSO CHECK:

Verano® products require little maintenance and have an incredibly long life. However, in the unlikely event of a product malfunction, contact your Verano® partner immediately. Make sure you check the following before you start cleaning your products:

- Fabric
- Aluminium profiles
- Distortion of the product
- Deviating sound when opening/closing

## ≡ Tips ≡

Take a quick look outside before you start cleaning. Is the sun shining brightly? Then postpone your cleaning activities for a little while. Firstly, because the weather is far too nice to be cleaning. And secondly, soapy water which dries too quickly can leave marks on the fabric.

# CLEANING THE FABRIC

## STEP 1

### Remove dirt

Remove any dust, branches and leaves with a brush.

## STEP 2

### Verano® partner

Contact your Verano® partner in case of heavy pollution and large stains. This way the quality of the awning is preserved.

## STEP 3

### Impregnate

It is important that you have your awning impregnated by your Verano® partner after cleaning. This prevents problems such as leaking and mold.

# CLEANING THE ALUMINIUM

## STEP 1

### Cleaning the aluminium

Clean the aluminium with lukewarm water and a cleaning product with a pH value lower than 7.5. Avoid scouring pads and high pressure cleaners to prevent the paint being affected.

## STEP 2

### Hinged parts

Apply a dry lubricant to the hinged parts of the aluminium. Carefully remove any remnants of the dry lubricant.

## STEP 3

### Lubricate parts

You can apply a dry lubricant, such as silicon spray, to the plastic guidance blocks, rubbers and the aluminium guidance profiles. Carefully remove any remnants of the dry lubricant.

## SAFE USE

We think it's important for the safety of your living environment to remain guaranteed! We would therefore like to ask you to consider the following safety measures before you start using your product:

The tubular motor is thermally protected, in the event of overheating, the protection is activated and you are temporarily unable to use the product. As soon as the engine has cooled, the thermal protection switches off automatically.

Don't use the product in strong winds (>5 bft), rain, hail or snow.

Only operate the product when there are no people and/or obstacles in the operating area.

Always use the services of a professional installer for any repairs and/or activities.

Don't use the product when ice has formed on the profiles.

# FABRIC CHARACTERISTICS

The Trend and Urban Colours fabric collections are developed with the greatest of care, yet it's still possible for phenomena to occur in the sun protection fabric. Despite the best production and processing techniques, these phenomena are unavoidable and the value of the sun protection fabric remains unaffected. So what should you be thinking about exactly?

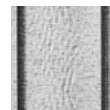

## KINK FOLDS

When light fabric colours are used, pigment shifts can sometimes occur in the kinks when the fabrics are produced. Kink folds will look darker than the fabric when held up against the light.

## CHALK STRIPES

Some light stripes can appear when processing the finished fabric, even with the absolute greatest care. These stripes are referred to as chalk stripes.

## WAVES

Double layers of fabric can cause different thicknesses on the fabric roll near the seams and hems. These can result in fabric tensions and subsequent waves.

## RAIN RESISTANCE

The fabrics in the Trend and Urban Colours are impregnated with water repellent and, with a minimum fabric slope of 14 degrees, will only be able to withstand a minor rain shower.

# DECLARATION OF CONFORMITY IIA

**The manufacturer:** Verano® B.V.  
Bedrijfsweg 8  
5683 CP Best  
The Netherlands

Declares under its full responsibility that the product:

Awning

Which concerns this declaration:

1. complies with the definitions of the Guideline for Machines (89/392/EEG),
2. complies with the Guideline for Low Voltage (73/23/EEG),
3. complies with the EMC- guideline (89/336/EEG),
4. complies with the following harmonised norm NEN-EN 60204,
5. complies with the following harmonised norm NEN-EN 13561.

Best, January 2006.

**Frank Pulles**  
Director

The declaration of conformity is applicable, provided that the product has been installed as indicated in this assembly manual and the use conforms to the assembly manual.

# WARRANTY REGISTRATION

Do you want to use the Verano® factory warranty? Visit [www.verano.nl/en/service/register-product/](http://www.verano.nl/en/service/register-product/) or scan the QR code below to register your product(s) for a 5 year manufacturer's warranty! You will find your Verano® product's unique product code on the back of this booklet, which you will need when filling in the warranty form.

Please also read through the warranty conditions, making sure you know when you are and aren't entitled to the warranty. You can also find this via the above link or QR code.

1 V296 - Santos | Sun awning

2 V550 - Ritzscreen®

3 V745 - Lüderitz | Windscreen

This is your Verano® product's unique product code.  
You can use this code to register the product for the warranty.

For a complete overview of our measure and installation instructions,  
please go to **[www.verano.nl/en/service/downloads](http://www.verano.nl/en/service/downloads)**.
