NATURE COLORS

## LIGHT AND HEAT REGULATION

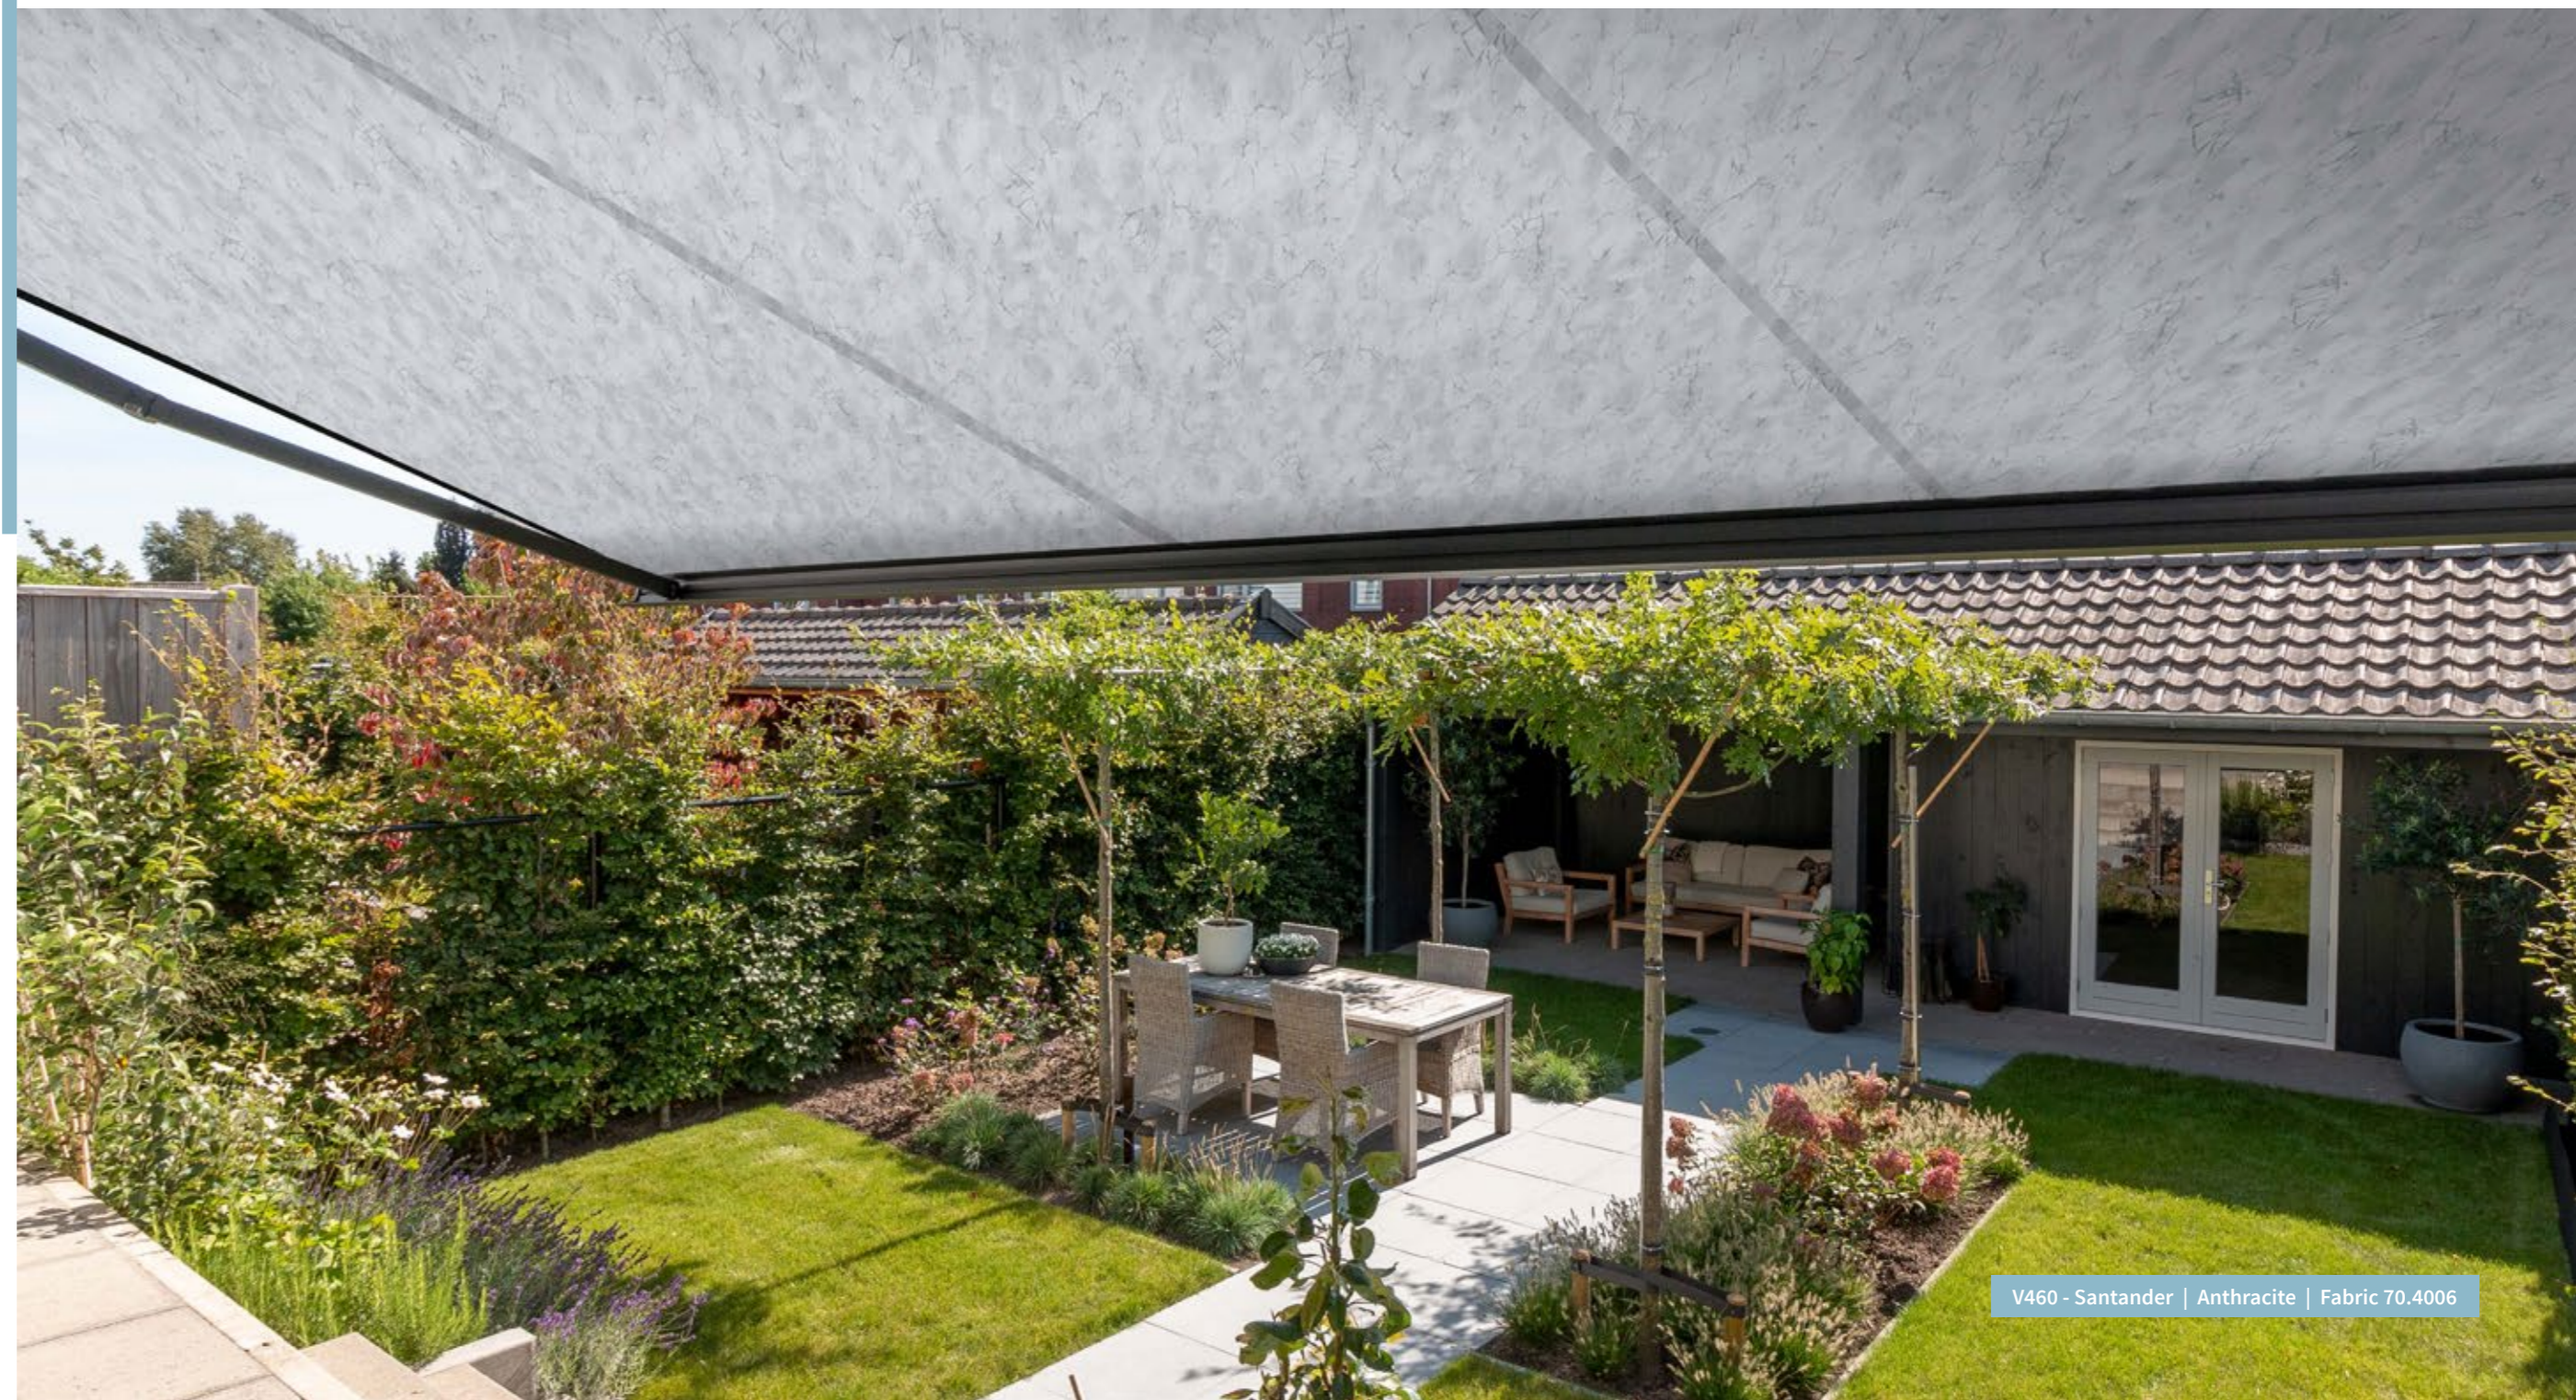

Ultraviolet radiation speeds up the natural aging process. This is scientifically proven. We've developed our Nature Colors fabric collection to contribute to the protection of our health. When sun rays reach the fabric, they are reflected, absorbed or let through. This depends on the density and color of the fabric. Lighter fabrics offer a minimal UV-protection of 95%, whereas darker fabrics offer up to 100% of UV-protection. These darker fabrics are highly effective at preventing overheating in your home. If you want to know more about our awnings, drop-arm awnings, canopy awnings and veranda sun protection screens, look at our extensive brochures.

## NATURE COLORS

Nature offers a wide variety of colors and structures, which is why we were inspired by it when creating this unique collection. The Nature Colors collection reflects nature's beauty, with fabric patterns varying from jungle patterns to an airy marble structure. The sun shading fabrics are made out of 100% polyester and consist of two sides: confection one (upper side) and confection two (bottom side). A print is included in the bottom side, whereas the upper side has a standard monochrome 'metal' or 'charcoal' coating. The type of coating depends on the chosen print.

# FABRIC QUALITIES

The Nature Colors fabrics are produced with great care. Yet, signs of wear may appear in the fabric. These signs are unavoidable, and the value of the sun protection fabric remains unaffected. Examples of signs of wear are:

## CREASE FOLDS

Pigment shifts might happen in the crease during the production of light-colored fabrics. These folding creases appear as dark stripes when held up against the light.

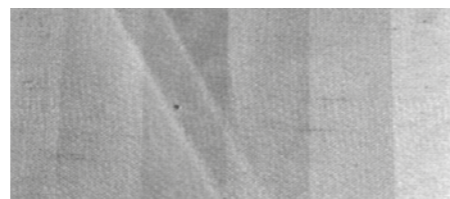

## CHALK STRIPES

Some light stripes may appear when processing the finished fabrics. These stripes are called chalk stripes.

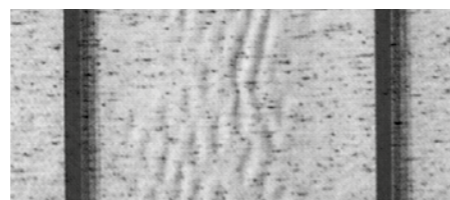

## WAVES

Double layers of fabric can cause different thicknesses on the fabric roll near the seams and hems. This may result in fabric tensions and subsequent waves.

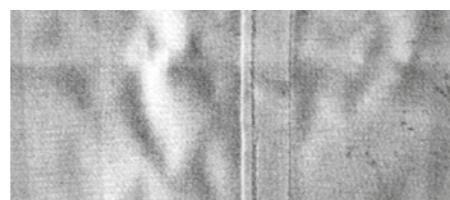

### CREASE FOLDS

### WAVY FABRIC

### WAVY SEAMS

## REGENERATIVE TEXTILE

The Nature Colors fabrics are made of high-quality polyester. The regenerative capacity of this textile is worth mentioning: If in any case wrinkles are formed, the fabric can return to its original sleek form when it's exposed to a combination of UV-radiation and warmth.

## WATER-REPELLENT

The sun awning fabrics are water-repellent, thanks to the impregnated and uniquely coated textile. As a result, rain drops easily slide off the fabric, making it possible for our fabrics to withstand a shower. A minimum angle of 10° ensures that the fabrics can withstand a large rain shower (50mm per hour). Sun shading products need to be closed during heavy and long-lasting rain showers to prevent any damage to the fabric or the installation. Products that are rolled away wet should be opened as soon as possible during dry weather.

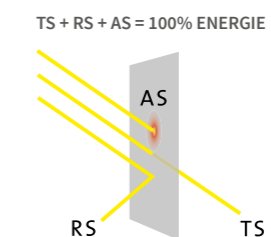

## SEAMS AND HEMS

30mm seams are applied to the left and right side of the fabrics. The upper side of the fabric is turned. As a result, the color of the coating will become visible. Sun awning fabrics are sewn vertically, and the confection is executed in a standard way.

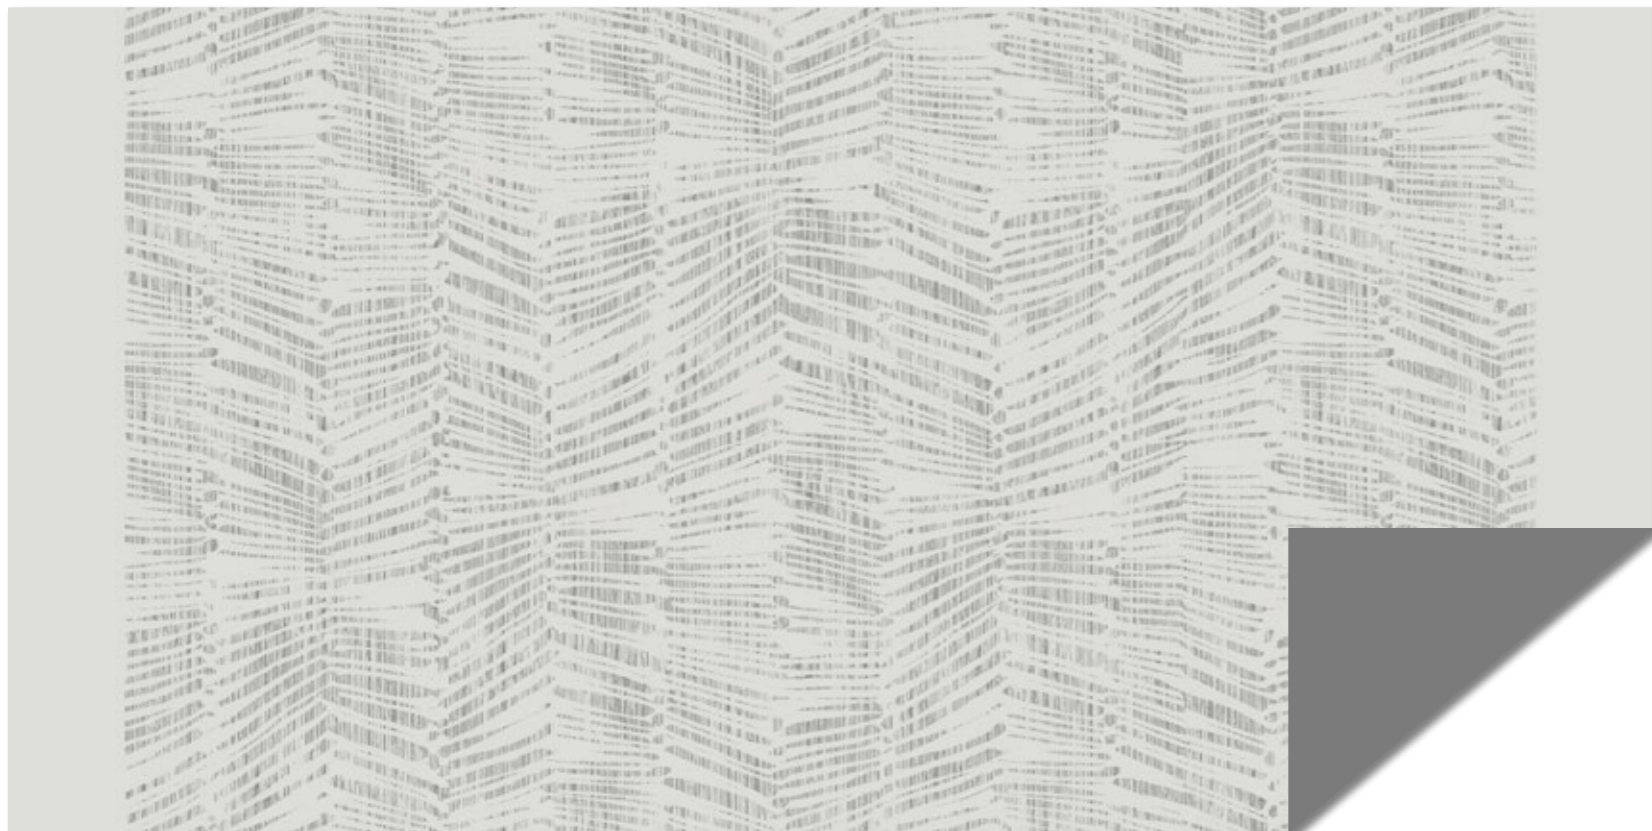

## FABRIC VALUES

Sun rays that reach the fabric are processed in the following 3 ways: by reflection, absorption and transmission:

- **Absorption value %**  
The percentage of energy that is absorbed by the fabric
- **Reflection value %**  
The percentage of energy that is reflected by the fabric
- **Transmission value %**  
The percentage of energy that is let through by the fabric

## NATURE COLORS WOODCUT

**70.4001**  
Woodcut concrete

Coating: metal TS: 2,6 RS: 14,3 AS: 83,1

A Nature Colors fabric consists of two sides: confection one (upper side) and confection two (bottom side). A print is included in the bottom side, whereas the upper side has a standard monochrome “metal” or “charcoal” coating. The type of coating depends on the chosen print.

Both the left side and the right side of the fabric have a 60 millimetre strip without print design. These strips are visible after confection.

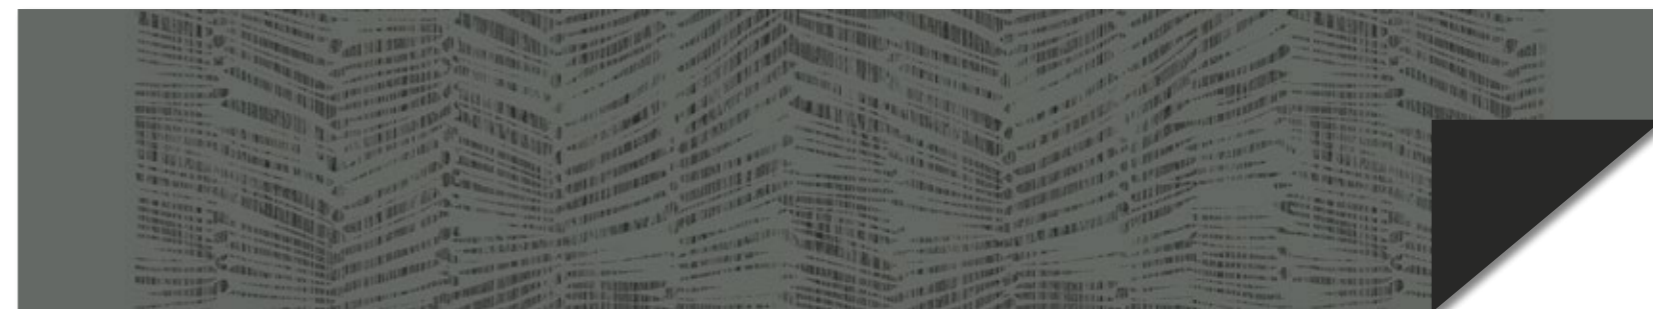

Experience our Nature Colors Collection with your own eyes. Make sure to ask your nearest Verano® partner for the color swatches!

## NATURE COLORS WOODCUT

**70.4002**  
Woodcut cloud

Coating: charcoal TS: 0,3 RS: 4,9 AS: 94,8

**70.4003**  
Woodcut jungle

Coating: charcoal TS: 0,3 RS: 4,9 AS: 94,8

**70.4004**  
Woodcut charcoal

Coating: charcoal TS: 0,3 RS: 4,9 AS: 94,8

## NATURE COLORS MARBLE

**70.4005**  
Marble concrete

Coating: metal TS: 2,6 RS: 14,3 AS: 83,1

A Nature Colors fabric consists of two sides: confection one (upper side) and confection two (bottom side). A print is included in the bottom side, whereas the upper side has a standard monochrome "metal" or "charcoal" coating. The type of coating depends on the chosen print.

The pattern is visible across the entire width of the fabric. There is no 60mm strip without print design.

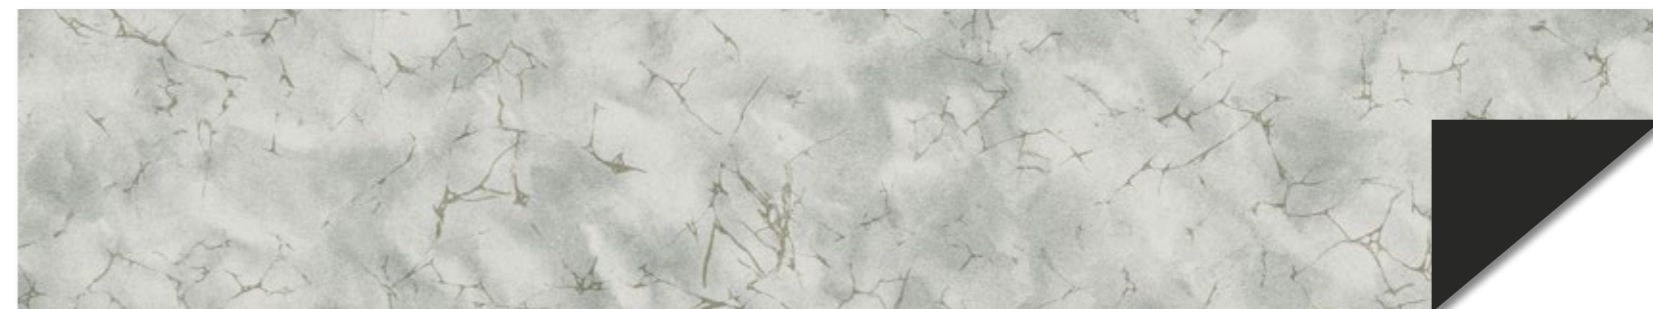

Experience our Nature Colors Collection with your own eyes. Make sure to ask your nearest Verano® partner for the color swatches!

## NATURE COLORS MARBLE

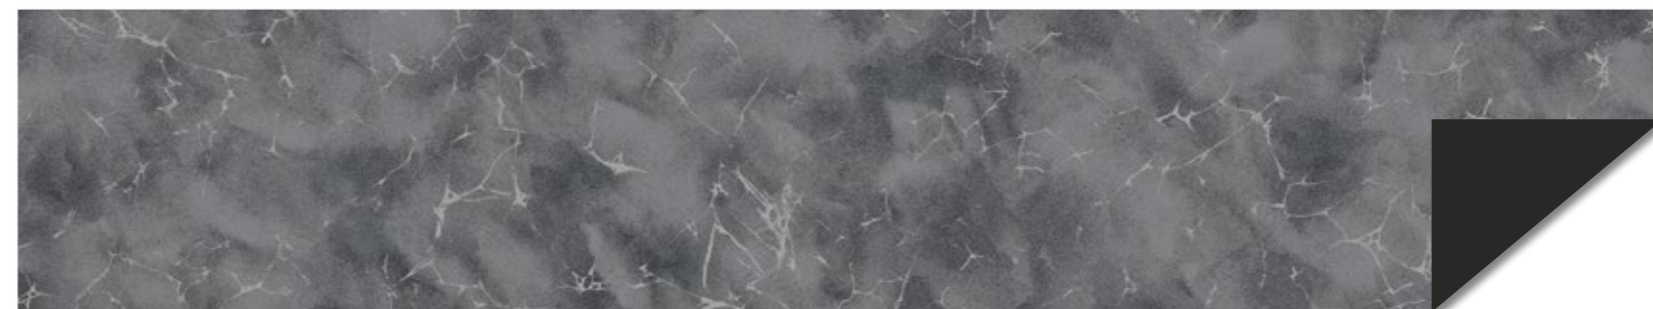

**70.4006**  
Marble cloud

Coating: charcoal TS: 0,3 RS: 4,9 AS: 94,8

**70.4007**  
Marble jungle

Coating: charcoal TS: 0,3 RS: 4,9 AS: 94,8

**70.4008**  
Marble charcoal

Coating: charcoal TS: 0,3 RS: 4,9 AS: 94,8

## NATURE COLORS PAMPAS

**70.4009**  
Pampas concrete

Coating: metal TS: 2,6 RS: 14,3 AS: 83,1

A Nature Colors fabric consists of two sides: confection one (upper side) and confection two (bottom side). A print is included in the bottom side, whereas the upper side has a standard monochrome "metal" or "charcoal" coating. The type of coating depends on the chosen print.

Both the left side and the right side of the fabric have a 60 millimetre strip without print design. These strips are visible after confection.
